Precision Emergency Training Cc

Who We Are

Precision Emergency Training CC focuses on developing the public with skills through accuracy in the fields of health and safety, various first aid, fire extinguisher and height safety awareness.

Emergency training is a very practical subject and can only be learnt with hands-on skills. Our courses are run in a relaxed environment where good theoretical and practical learning takes place at the pace of the participant. Our instructors all hold recognized resuscitation instructor qualifications; they are all registered with the Allied Health Professions Council (HPCNA), with years of practical hands-on experience as health care providers.

This practical “on the road” experience enables our instructors to draw from real life situations, making the training exciting, practical and applicable. Precision Emergency Training Cc provides onsite / inhouse training, travelling to all areas / Regions. We can customize our courses to suit your company’s needs.

Our Vision

To be a leading provider of practical, high-quality emergency training that empowers individuals and organizations with accurate, real-world skills in health and safety, various first aid, fire extinguishers and working at heights awareness. This is delivered by experienced, registered healthcare professionals through hands-on, learner-focused training that saves lives and builds safer communities.

Our Mission

Precision Emergency Training CC delivers practical health and safety, first aid, fire awareness and height safety training led by experienced, AHPC-registered instructors. We focus on real-world applications in a relaxed learning environment, offering flexible onsite and in-house training to meet our clients’ needs.

Sport First Aid and Injury Prevention

Overview

Sports First Aid and Injury Prevention include strategies to minimize and prevent injuries. This program will train the coach to recognize when intervention is needed and when additional medical support is required. Not only can quality first aid save someone's life, but it can reduce disability and hospitalization and accelerate return-to-play time. The Sports First Aid and Injury Prevention program is not inclusive for all aspects of first aid; it is specifically for illnesses and injuries that may be encountered in athletes, particularly young athletes. Although the program prepares coaches to handle many emergencies, the program also stresses the need to implement injury prevention strategies. This program is not a substitution for medical care, and the need for follow-up care by appropriate cannot be overemphasized.

Duration	CPR & Choking	AED Module	First Aid Module	Bleeding Control	Spinal Immobilization	Skills Test	Written Test	CPD Points	Certificate Valid
3 DAYS	YES	YES	YES	YES	YES	YES	YES	7	3 YEARS

Baby Basics First Aid (RCSA)

Overview

BABY BASICS is a three-hour orientation program. The program structure allows parents to practice the skills with an instructor prior to the arrival of the baby. The Baby Basics material includes Cardio Pulmonary Resuscitation (CPR), Choking, Fever and SIDS syndrome. **As this program is "participation only", no certificate is awarded on completion.** This program has been designed to equip parents, nannies and families on handling CPR and choking emergencies specifically focuses on **INFANTS** and **NEWBORN BABIES**.
